## CVE PUBLICATION

I found a vulnerability in the Learning Management System, Blackboard. I completed a write-up about the issue and followed the necessary steps in having it published by MITRE and NIST. It was given the enumeration: CVE-2020-9008. The publication can be found [here](#), and the write-up is located [here](#).

## PROJECTS

I enjoy programming in my free time and have several projects that are both finished and in the works. I have utilized a number of various languages and libraries for these projects. All of my works/projects can be found [here](#), on the projects page of my website.

## WORK & LEADERSHIP EXPERIENCE

- Sandia National Laboratories** Remote / Albuquerque, NM  
*TITANS Cybersecurity Intern*  
May - August 2022
- Simulmedia Inc** Manhattan, NY  
*DevOps Intern*  
June - July 2021
  - Created a Slack bot that alerts on OpenVPN errors or security issues / events. Written in Python3 and uses a custom algorithm for finding live updates in a sqlite database and preventing duplicates
  - Created a date parser in Python3 using the re and datetime libraries. Handles multiple date formats from Unix date timestamps to full month and day names
  - Improved a Python script that is used to collect the metrics of a service that are then sent to Datadog
  - Penetration Testing - Testing and dissecting different routes of microservices and gateways using tools such as Burp Suite
  - Researched and implemented Multi-Factor Authentication for OpenVPN Access Server
  - Researched, compared, and presented findings on potential use of key features in OpenVPN, Wireguard, and in AWS Client VPN
  - Apart of Sprint Reviews every week
  - End-of-internship presentation for a company audience of 100+

- Tools / Technologies Used: Git (GitHub), AWS CLI, AWS Linux 2, Python3, Clubhouse.io, Datadog, AWS EC2 / ECS, AWS IAM, cron / crontab, syslog, AWS Client VPN, json, webhooks, curl, Burp Suite, SQL, Jenkins, Viscosity, LDAP, SSO (OneLogin)

- **Decipher Technology Studios (greymatter.io)** Alexandria, VA  
*DevOps Security Intern* May – August 2020
  - Implemented the use of Open Policy Agent into a service mesh infrastructure in order to help protect sensitive information and Restful API endpoints
  - Designed and wrote policies in the Rego policy language for Open Policy Agent
  - Applied the FIPS 140-2 encryption standard to a service mesh built on top of Envoy proxy to ensure FIPS compliance
  - Wrote a small Kubernetes config sanitizer in GoLang for security purposes
  - Completed official documentation for projects in Markdown using GitBooks
  - Presented work in several product review meetings (SCRUM Meetings – Agile Development)
  - Used Throughout Internship: Docker, Kubernetes, Envoy Proxy, Git, Bazel, k3d, CircleCI, Helm Charts, Curl, Linux Command Line
- **Pico Quantitative Trading LLC** Chicago, IL  
*Information Security Team Intern* July 2019
  - Created Company Information Security policies including Bluetooth device security and Virtual Machine policies
  - Created reports for data collection and organization in Lansweeper by writing SQL scripts that search and organize host information across several Pico networks
  - Used PowerShell scripts to streamline network tasks
  - Performed GRC Incident and InfoSec compliance work
  - Used Microsoft Excel (Pivot Tables) to log Security Incident Reports back to 2016 up until 2019, organized and compiled statistics on elements such as: *Risk Type*, *Severity*, and *Affected Parties*
  - Compiled data into a readable summary in Microsoft PowerPoint to represent crucial data trends for Information Security Reports used by the InfoSec team
  - Studied SANS institute InfoSec Policies
  - Utilized Microsoft Visio to create detailed virtual schematic models of different networks and devices operated by Pico
- **Elevated Computing** Manhattan, NY  
*Information Technology Intern* July – August 2014
  - Undertook computer science research related to networks and communications
  - Responsible for server management and creation of Linux server (Cent OS)
  - Utilized Nagios XI to monitor health of client networks/servers
  - Provided IT support to client's employees, including both phone and remote desktop support
- **Department of Immunology & Microbiology, New York Medical College** Valhalla, NY  
*Research Assistant* July – August 2015
  - Performed bench research related to DNA toxoplasmosis parasite known as *T. Gondii*
  - Used methods such as Polymerase Chain Reaction and Gel Electrophoresis
  - Attended a conference related to research
  - Drafted research paper summarizing research results
- **Fordham Preparatory School** New Rochelle, NY  
*Assistant Rowing Coach* May – August 2018
  - Driving students to and from the Fordham Prep campus, boathouse, and New Rochelle train station in a Fordham Prep bus
  - Driving boat launch alongside rowers whilst coaching
